

Action plan

The Highlight of our institution is its proximity to the state highway, ensuring the easy accessibility and conveyance of the staff and students. For helping the students from remote localities, the management is planning to share the Bus facility of our sister concern school in the same campus. For improving the teaching - learning process, we implemented two more interactive boards to the general classes. Computer Lab is expanded with 5 more computers along with the existing 10 computers. We are modifying our campus with a more organized modified garden. We also arranged Canteen facilities for our staff and students.
